The Seven Green Hills are in danger again. Once more, you must rise to the challenge and defeat the invaders. You are in command of Defence Forces' latest battle tank. Patrol the zone surrounded by the Seven Green Hills and destroy all enemy tanks you can. You are up against two types of enemy weapon:

MEDIUM TANK

The medium tank is tenacious and can turn quickly towards you.

The sand sled is quite speedy and comes after you very rapidly.

SAND SLED

Fortunately you are not alone. On each level, there is

a fuel bay to replenish your fuel and provide some repair facilities.

Visit the fuel bay as often as you like. Drive through the fuel bay to fill up.

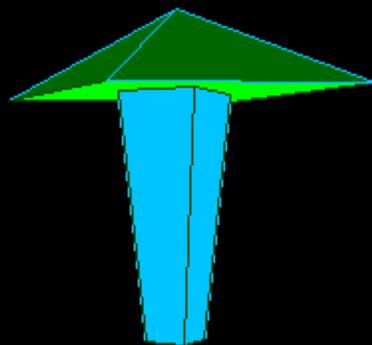

FUEL BAY

Each level also has a Star Gate, which will transport you to the next level. The Star Gate is always open and becomes visible

after you have dispatched enough enemies on each level.

Drive into it to engage the gate.

STAR GATE

Scattered around the battle field are indestructible obstacles – cubes and pyramids. Don't run into them, or enemy tanks, as this does serious damage to your own tank.

It has been discovered that the enemy is not very careful with his shooting. With careful positioning, you can get them to shoot each other. Unfortunately, the enemy seems to have a limitless supply of equipment, so each destroyed tank is quickly replaced.
